Source: HELP_REQUEST_20260623.md — section links work in PDF viewers that support internal anchors.

Supersedes tmp/20260608_help_request.md for **email inbox** and **clone workflow**.
Original PDF still valid for DNS/MX items not listed here.

Done / updated by agent

Item	Status
Gmail destination	bestcastr@gmail.com (replaces foxxspambox0@gmail.com)
alpine-be msmtplib	bestcastr@gmail.com + app password in /etc/androidcast/msmtplib.secret
Lab cluster mail	cast01: deploy-mailrelay.sh (msmtplib), PHP sendmail transport
Dev clone path	~/repos/ac ← git clone git://f0xx.org/ac/ac-workspace
ac-be-public-assets	ac-bash.env for shared non-secret env

Your verification (after agent test send)

1. Check bestcastr@gmail.com inbox for:
 - msmtplib CLI smoke from cast01 (Lab mail relay or similar subject from verify script)
 - Optional: registration mail after you test /issues/register
2. Reply: **“mail received”** or paste failure (Gmail spam, delay, etc.)

Still on you (unchanged from 20260608)

Task	Notes
2.1 DNS	MX/SPF/DKIM/DMARC — apex f0xx.org if apps.f0xx.org is CNAME
ImprovMX	Activate aliases info@ / admin@ / root@ → bestcastr@gmail.com (hoster.by partial)
FE acl0	Install ac-fe.conf on monstro — see ac-platform-edge/fe/INSTALL.md
Inbound	Confirm forwarded mail to bestcastr@gmail.com after ImprovMX live
